

- Let's go with Mockup B
 - Placement of "hello, friend" makes more sense
 - Logo at top left corner is good as home button
 - The blue doesn't capture the feeling of the show as well, so use the red and black color scheme
- The inconsistent width of elements all with the left alignment doesn't feel comfortable
- Add premise and footer to home page
- Add a navigation that spans the top and try using sticky positioning

Refer to outline

- Grid for cast page
- Add imagery to production page
 - For concept and development use image from wiki page
 - For accuracy use an image of a coding scene from the show
